Subject: Re: EPA Fact-sheet - Naval Weapons Industrial Reserve Plant and Northrop Grumman Corporation Site (2)_wDOHcmts.docx

Thanks again for the quick turn-around time. I want to respond to the comment from DOH regarding the 'no status' for 'Human Exposures Under Control' in the box at the top of the document. Unfortunately, we cannot officially say that exposures are under control until a formal determination (CA725) is prepared on this. NY State normally prepares these determinations. This ties into the e-mail that I sent to DEC (Henry and Steve S) yesterday, but which I also should have sent to Steve K. The EPA/DEC Grant Workplan shows the Navy/Grumman Bethpage facility as a possible candidate for completing the "human exposures under control" determination by March 31, 2015. At your convenience, please let me know if this is being planned, and who would be preparing the written determination. After the determination is signed, we will be able to say that 'human exposures are under control' and to link the document to the EPA website.

Thanks,
-Carol-

Carol,

Attached please find the Redline-strikeout of the USEPA draft factsheet. This document has been reviewed by the NYSDEC and the NYSDOH. Please contact either Henry Wilkie, Steve Karpinski or myself if you have any questions.

Thanks,

Steve
